5. `updateShippingCost` – 帮助卖家快速修改运费

# 国际物流运费表介绍

国际物流运费价格表可以为不同的国家设置特定的运输服务和运输费用，例如可以选择指定的 SpeedPAK 物流服务，设置配送到不同国家的运费。选择合适的运输方案将会显示较短的 Estimated Delivery Date（商品预计送达时间），这会提升买家对商品的印象，进而提高商品销售速度和转化率。

Region	Select shipping service (optional)	Cost	+per pound	Delete
Africa - Algeria	Expedited Shipping from Greater China to worldwide	\$12.00	\$1.00	
Europe (including UK) - Bulgaria, Croatia, Republic of	SpeedPAK Standard	\$13.00	\$1.00

## 2. API介绍与调用顺序

API为卖家提供了管理国际运费价格表的高级方法(get Rate Table方法和update Shipping Cost方法), 支持应用在美国、英国、德国、澳大利亚、加拿大、法国、意大利和西班牙8大eBay站点上。

1. 卖家可以先使用get Rate Tables方法来检索卖家的运费表, 这是运费表的基础信息 (包括运费表ID和名称等) 的集合。

📄 请参考: [https://developer.ebay.com/api-docs/sell/account/resources/rate\\_table/methods/getRateTables](https://developer.ebay.com/api-docs/sell/account/resources/rate_table/methods/getRateTables)

2. 然后卖家可以使用获取的运费表 ID 之一, 调用 get Rate Table方法来获取指定运费表的详细信息 (详细信息包括名称、ID、地区和运费等)。

📄 请参考: [https://developer.ebay.com/api-docs/sell/account/v2/resources/rate\\_table/methods/getRateTable](https://developer.ebay.com/api-docs/sell/account/v2/resources/rate_table/methods/getRateTable)

3. 之后卖家可以通过调用 update Shipping Cost 方法, 修改运费信息。

📄 请参考: [https://developer.ebay.com/api-docs/sell/account/v2/resources/rate\\_table/methods/updateShippingCost](https://developer.ebay.com/api-docs/sell/account/v2/resources/rate_table/methods/updateShippingCost)

### 3. getRateTables – 获取卖家所设置的运费表的基础信息

方法	GET	
	描述	返回结果
<a href="#">/sell/account/v1/rate_table</a>	检索卖家为eBay site所设置的运费表。	<pre>{   "rateTables": [     {       "countryCode": "CountryCodeEnum : [AD,AE,...]",       "locality": "ShippingOptionTypeEnum : [DOMESTIC,INTERNATIONAL]",       "name": "string",       "rateTableId": "string"     }   ] }</pre>

调用要点：

1. 如果在path中设置country\_code参数，如[/sell/account/v1/rate\\_table? country\\_code=US](#)，将会仅返回seller在该站点中所设置的运费表。如不指定country\_code,将返回该卖家在所有站点中设置的运费表。
2. 运费表支持以下站点: EBAY\_AU,EBAY\_CA,EBAY\_DE,EBAY\_ES,EBAY\_FR,EBAY\_GB,EBAY\_IT,EBAY\_US

# getRateTables 示例

```
{
  "rateTables": [
    {
      "rateTableId": "5120508015",
      "countryCode": "US",
      "name": "domestic test1",
      "locality": "DOMESTIC"
    },
    {
      "rateTableId": "5170521015",
      "countryCode": "US",
      "name": "bamitem",
      "locality": "DOMESTIC"
    },
    {
      "rateTableId": "5024895015",
      "countryCode": "US",
      "name": "Ship Norway Only",
      "locality": "INTERNATIONAL"
    }
  ]
}
```

## 4. getRateTable – 获取运费表的详细内容

方法	GET	
	描述	返回结果
<a href="#">/sell/account/v2/rate_table/{rate_table_id}</a>	获取单个运费表的详细信息	<pre>{   "marketplaceId": "(enum) : [EBAY_US, EBAY_CA, EBAY_GB, EBAY_AU, EBAY_IT, EBAY_UK, EBAY_ES, EBAY_FR]",   "rateTableId": "(string)",   "name": "(string)",   "shippingOptionType": "(enum) : [DOMESTIC, INTERNATIONAL]",   "rateTableBasis": "(enum) : [ITEM, WEIGHT, SURCHARGE]",   "rates": [     {       "rateId": "(string)",       "shippingServiceCode": "(string)",       "shippingCategory": "(enum) : [ONE_DAY, EXPEDITED, STANDARD, ECONOMY, EXPRESS]",       "shippingRegionNames": [         "(string)"       ],       "shippingCost": {         "currency": "(enum) : [AED, AFN, ALL, AMD, AOA, ...]",         "value": "(string)"       },       "additionalCost": {         "currency": "(enum) : [AED, AFN, ALL, AMD, AOA, ...]",         "value": "(string)"       }     }   ] }</pre>

- shippingOptionType指当前运费表类型，分为
  - DOMESTIC：当前站点国内State或Province运费表，将返回以该国家国内各State或Province为目的地的运费表。
  - INTERNATIONAL：国际运费表，将返回以世界各国为目的地的运费表。
- rateTableBasis指当前运费表运算方式，分为：
  - ITEM：订单商品数量累积运费，根据用户购买商品数量乘算设置运费。即shippingCost \* 订单商品数量
  - WEIGHT：订单商品总重量累积运费，根据用户购买商品重量乘算设置运费。即shippingCost+订单总重量\*AdditionalCost。
  - SURCHARGE：附加运费，仅用于DOMESTIC模式，在卖家shipping policy所设置的默认运费基础上，累加AdditionalCost。

# getRateTable 示例

```
{
  "rateTableId": "5120510015",
  "marketplaceId": "EBAY_US",
  "name": "weightIRTest1",
  "shippingOptionType": "INTERNATIONAL",
  "rateTableBasis": "WEIGHT",
  "rates": [
    {
      "rateId": "1",
      "shippingServiceCode": "US_IntlStandardSppedPAK",
      "shippingCategory": "STANDARD",
      "shippingRegionNames": [
        "Finland",
        "Norway"
      ],
      "shippingCost": {
        "value": "30.00",
        "currency": "USD"
      },
      "additionalCost": {
        "value": "5.00",
        "currency": "USD"
      }
    },
    {
      "rateId": "2",
      "shippingServiceCode": "US_SPEEDPAK_EU_DDU",
      "shippingCategory": "STANDARD",
      "shippingRegionNames": [
        "Mexico"
      ],
      "shippingCost": {
        "value": "15.00",
        "currency": "USD"
      },
      "additionalCost": {
        "value": "3.00",
        "currency": "USD"
      }
    }
  ]
}
```

## 5. updateShippingCost - 帮助卖家快速修改运费

Method	POST		
	Description	Request	Response
<a href="#">/sell/account/v2/rate_table/{rate_table_id}/update_shipping_cost</a>	更改单个运费表的价格	<pre>{   "rates": [     {       "rateId": "(string)",       "shippingCost": {         "currency": "(enum) : [AED, AFN, ALL, AMD, AOA, ...]",         "value": "(string)"       },       "additionalCost": {         "currency": "(enum) : [AED, AFN, ALL, AMD, AOA, ...]",         "value": "(string)"       }     }   ] }</pre>	204

调用要点：

1. 当rateTableBasis = **ITEM**时，只需要输入shippingCost
2. 当rateTableBasis = **WEIGHT**时，需同时输入 shippingCost和additionalCost
3. 当rateTableBasis = **SURCHARGE**（仅限Domestic Rate Table)时，只使用additionalCost

# updateShippingCost 示例-1

当rateTableBasis = **ITEM**时，只使用shippingCost

```
{
  "rates": [
    {
      "rateId": "1",
      "shippingCost": {
        "currency": "USD",
        "value": "3.35"
      }
    },
    {
      "rateId": "4",
      "shippingCost": {
        "currency": "USD",
        "value": "5.15"
      }
    },
    {
      "rateId": "7",
      "shippingCost": {
        "currency": "USD",
        "value": "5.75"
      }
    }
  ]
}
```

## updateShippingCost 示例-2

当rateTableBasis = **WEIGHT**时，将同时使用shippingCost和additionalCost

```
{
  "rates": [
    {
      "rateId": "2",
      "shippingCost": {
        "currency": "USD",
        "value": "2.35"
      },
      "additionalCost": {
        "currency": "USD",
        "value": "0.75"
      }
    },
    {
      "rateId": "12",
      "shippingCost": {
        "currency": "USD",
        "value": "4.15"
      },
      "additionalCost": {
        "currency": "USD",
        "value": "1.25"
      }
    }
  ]
}
```

# updateShippingCost示例-3

当rateTableBasis = **SURCHARGE** ( 仅限Domestic Rate Table)时，只使用additionalCost

```
{
  "rates": [
    {
      "rateId": "2",
      "additionalCost": {
        "currency": "USD",
        "value": "1.75"
      }
    },
    {
      "rateId": "3",
      "additionalCost": {
        "currency": "USD",
        "value": "1.27"
      }
    },
    {
      "rateId": "7",
      "additionalCost": {
        "currency": "USD",
        "value": "0.75"
      }
    }
  ]
}
```

# Q&A
